2 Project Overview

2.1 What Are We Building

2.1.1 System Function

Comprehensive wellness and preventive care management system handling health screening programs, vaccination tracking, chronic disease management, health education, wellness challenges, lifestyle coaching, maternal and child health programs, fitness tracking, nutrition counseling, mental health support, wellness provider network, and wellness analytics

2.1.2 Users

- Wellness Coordinators (program management)
- Wellness Agents (member engagement)
- Nurses and Health Educators (screening and education)
- Members (wellness participation and tracking)
- Wellness Providers (screening facilities, gyms, nutritionists)
- Wellness Manager (program oversight and analytics)
- Corporate HR Teams (employee wellness programs)

2.1.3 Problem Solved

No preventive care programs, reactive healthcare approach, high chronic disease burden, lack of member engagement in health, no health screening tracking, limited wellness incentives, no fitness tracking integration, lack of health education resources, no maternal/child health programs

2.1.4 Key Success Metric

60% member participation in wellness programs within 12 months, 30% increase in health screening completion, 40% member engagement in wellness challenges, 25% reduction in preventable hospitalizations, 50% chronic disease management enrollment, wellness cost savings of 15% through prevention

2.2 Scope

2.2.1 In Scope

- Health screening program management (annual checkups, cancer screening, diabetes screening)
- Vaccination tracking and reminders
- Chronic disease management programs (diabetes, hypertension, asthma)
- Health risk assessment (HRA) questionnaires
